Healthcare Digest

> **Week of August 17, 2026**
> Market data through: August 14, 2026
> Narrative created: August 17, 2026

Weekly review of healthcare services, technology, distribution, and diagnostic company performance, changes, earnings activity, and strategy narrative.

Strategy Narrative

- 1. Prior-authorization transparency has moved from theoretical reputational risk to measurable payer differentiation
- 2. The No Surprises Act ruling shifts dollars toward providers and increases the value of contract-rate intelligence
- 3. Epic is turning interoperability from document exchange into workflow infrastructure
- 4. The administration is linking coverage policy, coding analytics and fraud enforcement

This week produced four developments worth carrying forward. The most consequential is **new empirical prior-authorization data that turns the transparency regime discussed in prior briefs into an actual competitive benchmark**. Separately, the Fifth Circuit materially altered No Surprises Act economics, Epic extended its interoperability platform into diagnostic imaging, and the administration converted a Medicaid coverage policy into a payment-integrity enforcement campaign.

I am intentionally **not** giving Aetna, Humana or UnitedHealth standalone earnings updates this week. Their recent-quarter theses remain largely unchanged, and I found no company-specific disclosure in the last seven days significant enough to justify repeating them. The one exception is UnitedHealth's appearance in the new cross-payer prior-authorization data.

1. Prior-authorization transparency has moved from theoretical reputational risk to measurable payer differentiation

Prior briefs identified CMS's new authorization reporting regime as likely to create external comparisons among insurers. This week, KFF performed essentially that first large-scale comparison using federally required 2025 disclosures across Medicare Advantage, Medicaid managed care and ACA plans. KFF+1

What changed: The differences are large enough to matter strategically. Standard-request denial rates averaged **12% in Medicare Advantage, 14% in Medicaid managed care and 18% in ACA Marketplace plans**. Within MA, rates among six major insurers ranged from **5% for Elevance to 17% for UnitedHealth Group**. UnitedHealth's reported standard denial rates also varied significantly by business: 17% in MA, 11% in Medicaid managed care and 21% in the ACA Marketplace. KFF+1

The more consequential figure may be appeals. **67% of appealed MA authorization denials were eventually overturned**, versus 47% in Medicaid managed care and 43% in the Marketplace. UnitedHealth overturned 81% of appealed Medicaid managed-care denials in KFF's dataset. KFF

At the same time, the data weaken a simple "payers are too slow" narrative: median standard decision time was about **one day** across all three markets, materially faster than regulatory maximums. CVS/Aetna, Humana and Kaiser reported MA median standard response times of less than one day. KFF+1

What it tells us: Our prior thesis needs refinement. **Decision speed is becoming less differentiated than decision quality.** As electronic authorization accelerates, the strategic battleground shifts toward what gets denied, why it gets denied and whether the initial determination survives appeal.

A high overturn rate can reflect missing documentation rather than an incorrect initial decision, and KFF warns that current reporting lacks enough service-level detail to separate those explanations. But that limitation itself identifies the next technology opportunity: payer systems need to connect **coverage requirements → submitted evidence → initial decision → additional documentation → appeal outcome**. KFF

Strategic implication: Payment Integrity, UM and EDI increasingly share the same KPI: **first-pass decision accuracy**. A system that makes an authorization decision in minutes but creates appeals and provider rework has automated latency without solving administrative cost.

Watch next: CMS reporting enhancements requiring numeric volumes and more standardized metrics would dramatically increase benchmarking value. Also watch whether health systems and employer groups begin using insurer-level denial and overturn data in contracting.

---

2. The No Surprises Act ruling shifts dollars toward providers and increases the value of contract-rate intelligence

On August 11, the en banc Fifth Circuit invalidated key elements of the federal methodology for calculating the No Surprises Act's **Qualifying Payment Amount (QPA)**. The court ruled that insurers may not incorporate "ghost rates"—contracted prices for services a provider does not actually perform—and must include bonus and incentive payments when calculating the benchmark. It allowed insurers to continue excluding one-off agreements such as individual air-ambulance arrangements. Reuters+1

Why it matters: This is a substantive payer/provider financial delta rather than another procedural NSA lawsuit. QPAs influence the independent dispute-resolution process for out-of-network claims; removing artificially low contractual rates and adding incentive payments should generally push the relevant benchmark upward. The ruling therefore favors providers economically and weakens one lever insurers have used to constrain out-of-network reimbursement. Reuters

The magnitude could be meaningful. CMS recently said arbitration awards grew from **$4.1 billion in 2024 to $14.9 billion in 2025**, while arguing that parts of the dispute process were being gamed. Reuters

What it tells us: Contract intelligence is becoming a more strategic capability on both sides. Payers need defensible QPA construction and stronger visibility into actual contracted-rate distributions; providers need sufficient reimbursement analytics to identify claims where arbitration has positive expected value.

This also intersects with payment integrity. As out-of-network settlements become more valuable, payers have greater incentive to scrutinize eligibility, coding, bundling and documentation surrounding disputed claims—while providers have greater incentive to automate identification and pursuit of underpayments.

Watch next: Federal agency guidance is the immediate catalyst. The court specifically noted that agencies can use enforcement discretion while replacing the methodology, so operational disruption may be limited initially. The new formula—and whether litigation follows it—will determine the longer-run economics. Reuters

---

3. Epic is turning interoperability from document exchange into workflow infrastructure

On August 13, Epic made **Care Everywhere Diagnostic Image Exchange** broadly available, allowing clinicians to retrieve full diagnostic-quality CTs, MRIs, X-rays and other images from participating Epic health systems with one click. Previously, Epic could exchange radiology reports and lower-resolution reference images; full diagnostic images frequently required separate retrieval processes or physical media. Epic

Why it matters: Last week's brief argued that the strategic value in health technology is increasingly accruing to platforms controlling shared infrastructure and adjacent workflows. Epic's move strengthens that thesis.

Diagnostic imaging has historically sat partly outside the EHR in PACS and image-archive systems. Epic is now using its installed interoperability network and open image-sharing standards to bridge those systems directly. Epic says its existing duplicate-order checks already prevent more than **21,000 repeat scans annually**; direct image access potentially extends that benefit. Epic

What it tells us: Epic's moat is expanding beyond the medical record itself toward the **network connecting clinical organizations**. Every workflow that migrates into Care Everywhere makes the installed ecosystem more useful and potentially reduces the role of standalone exchange vendors.

For payers, there is an indirect but important implication. As richer clinical evidence becomes electronically portable, imaging increasingly becomes available to authorization, quality and payment-integrity workflows without bespoke medical-record retrieval.

Watch next: Epic is advocating inclusion of open image-sharing standards within TEFCA. If diagnostic imaging becomes a routine national exchange capability rather than an Epic-to-Epic feature, the bigger opportunity shifts toward software that can interpret and operationalize the images and associated metadata. Epic

---

4. The administration is linking coverage policy, coding analytics and fraud enforcement

CMS finalized a rule on August 11 ending federal Medicaid and CHIP funding for specified gender-transition procedures for minors, effective **October 13, 2026**, with a limited six-month transition for certain existing hormone-therapy patients. The policy applies to federal matching funds rather than prohibiting states from financing care themselves. Centers for Medicare & Medicaid Services+1

Two days later, HHS escalated the issue from coverage policy to payment integrity. It referred more than 200 hospitals, physician groups, pharmacies, PBMs and other organizations to federal

investigators after alleging anomalous billing patterns, including use of endocrine or other diagnosis codes in claims associated with gender-related treatment. HHS cited roughly $120 million in related billing since 2019; targeted providers and advocates dispute the administration's underlying characterization of this care, and investigations have not established fraud. Reuters+1

What it tells us: Whatever one's view of the underlying clinical policy, the operational lesson for payers and providers is significant: **the administration is willing to use claims analytics to convert a policy priority into targeted coding and payment investigations.**

That strengthens the broader thesis from recent Medicaid Fraud War Room activity: diagnosis-code integrity, clinical indication and coverage policy are becoming tightly coupled enforcement domains.

For providers, coding governance therefore needs to answer not only "does this code support reimbursement?" but "does the longitudinal clinical record support why this code was selected?" For Medicaid plans and PBMs, new exclusions also require benefit configuration, edits and clinical-policy changes before October 13. Centers for Medicare & Medicaid Services

Watch next: Legal challenges are highly likely to determine the policy's durability. Separately, watch whether OIG/DOJ investigations substantiate the billing allegations. That distinction matters: a policy disagreement becoming an investigation is not the same as evidence ultimately demonstrating improper claims.

Strategic synthesis

The strongest new inference this week is that **transparency is beginning to change the value of automation**.

Until now, payer automation could be evaluated primarily internally: faster decisions, lower administrative cost, more savings. The new prior-authorization disclosures allow outsiders to observe outputs—denial rates, response times and overturned decisions. The NSA decision increases financial consequences when payer reimbursement methodology is successfully challenged. Meanwhile, federal investigators are using claims data to scrutinize diagnosis selection.

That shifts competitive advantage from **"automate more decisions"** toward **"make automated decisions that remain defensible when someone else can inspect the outcome."**

For Payment Integrity, Risk, Quality and EDI, that means evidence provenance, explainability, consistent policy logic and appeal feedback loops are moving from compliance features toward core product capabilities.

On the provider side, Epic's image exchange illustrates the complementary trend: the data needed to support those decisions are becoming easier to move.

Taken together, the architecture becoming more valuable is not merely:

data → AI → decision

but:

clinical evidence → policy → decision → external scrutiny → outcome → feedback into the next decision.

That is the incremental strategic thesis I would carry into next week.

Notable Changes

Comparison with the final report dated August 10, 2026 (market data through August 7, 2026).

Cardinal Health (CAH) +20.5%

Reported: August 11, 2026 · Google Finance earnings page

Earnings Call Summary

Cardinal Health reported strong Q4 fiscal 2026 performance with total company revenue growing 6% to $63.7B, driven by the Pharmaceutical and Specialty Solutions segment. Enterprise operating

income grew 30% to $935M, and diluted EPS increased 40% to $2.91, which included a $0.31 one-time benefit from IEEPA tariff refunds.

At a Glance

- **Cardinal Health Delivers Mixed Financial Results:** Cardinal Health reported an adjusted EPS of $1.68, which fell short of the estimated $2.421, while reported quarterly revenue reached $63.67 billion, missing the projected $65.11 billion despite growing 6% year-over-year.
- **Pharma Core Drives Steady Performance Growth:** The Pharmaceutical and Specialty Solutions segment drove overall momentum with a 6% revenue increase to $58.8 billion and a 21% jump in profit, contrasting with a 2% volume-driven revenue decline in Global Medical Products and Distribution.
- **Guidance Outpaces Long-Term Targets:** Management issued an upbeat outlook for fiscal year 2027, projecting non-GAAP EPS growth of 13% to 15% ($12.40 to $12.60) which sits comfortably above the company's long-term annual target of 12% to 14%.
- **Tariff Winds Yield Temporary Profit Gain:** The bottom line benefited from a non-recurring $100 million net operating profit impact from an IEEPA tariff refund, which added an extra $0.31 to the company's baseline diluted EPS.
- **Massive New Share Buyback Authorized:** Fueled by full-year adjusted free cash flow generation of $5 billion, the company's board approved a substantial $5 billion increase to its share repurchase program.
- **Higher-Margin Growth Businesses Accelerate Portfolio:** Cardinal Health's smaller growth businesses, including at-Home Solutions and OptiFreight Logistics, delivered an aggregate 14% profit increase, supported by secular care trends and strategic capacity expansions.

Key Moments from the Call

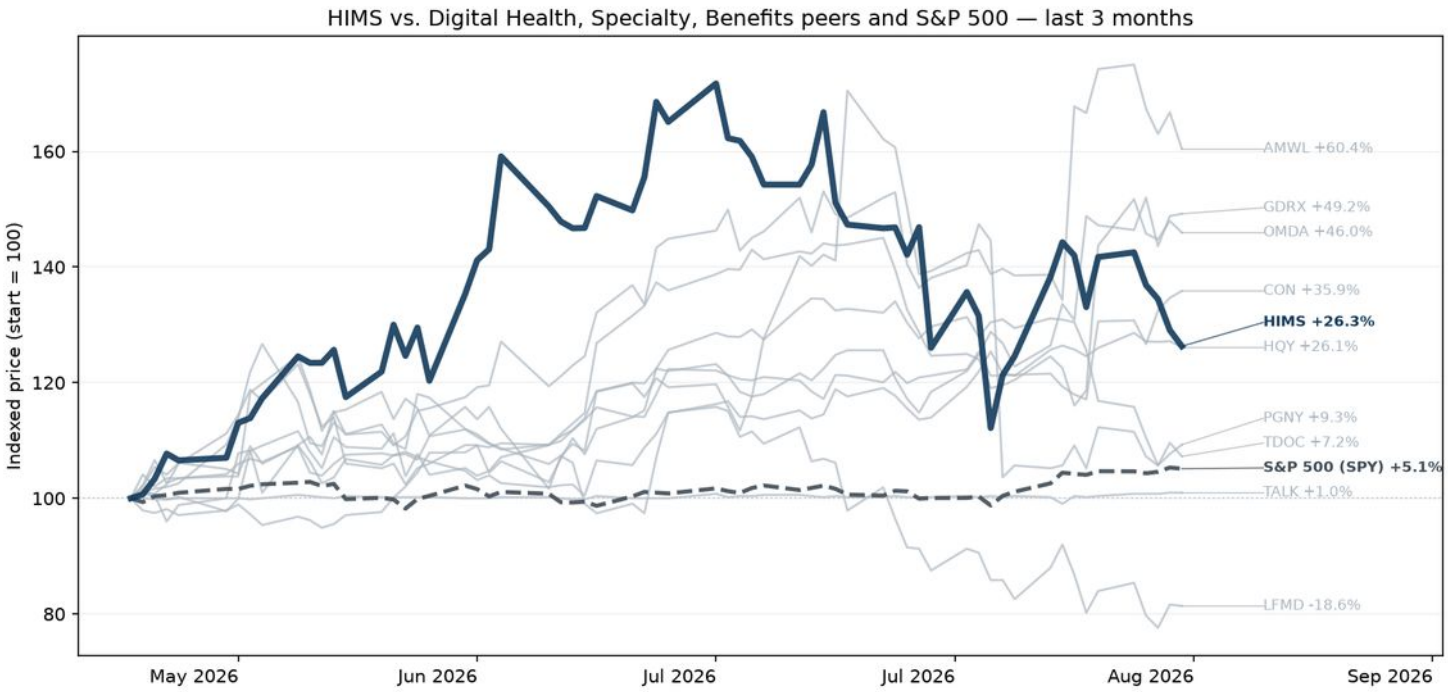

- **11m 41s — Strong Fiscal 2027 Guidance Above Long-Term Targets:** Management projected fiscal 2027 EPS growth of 13% to 15% ($12.40-$12.60), outpacing its reconfirmed long-term growth rate of 12% to 14%. This strong outlook reassures investors of continued growth durability, supported by solid core volume demand and strategic multi-year investments across segments.
- **13m 37s — Pharma Margin Profile Aided by Generic Launches:** The Pharmaceutical segment profit is guided to grow 8% to 11% in fiscal 2027, driven by higher-margin specialty expansions and carryover generic launches. Investors will appreciate that expected IRA price changes will create top-line headwinds without adversely impacting bottom-line profitability.
- **15m 25s — Geopolitical Conflicts Threaten Lower-End GMPD Targets:** While the GMPD segment profit is guided to $200M-$220M, management explicitly highlighted that a

protracted conflict in Iran and subsequent commodity or fuel cost escalation would push performance to the lower end of expectations, creating an area of macro concern for investors.

- **26m 57s — Massive $5 Billion Increase in Share Repurchase Authorization:** Cardinal Health announced a new $5B increase to its share repurchase authority, bringing the total program availability to $6.4B. Backed by a baseline commitment of at least $1B in buybacks for fiscal 2027, this aggressive capital deployment signals deep management confidence in sustained cash generation.

Hims & Hers (HIMS) +12.4%

Reported: August 10, 2026 · Google Finance earnings page

Earnings Call Summary

Hims & Hers reported Q2 2026 revenue of $753.2M, up nearly 40% year-over-year, beating the estimated $730.1M. Subscriptions grew to nearly 3 million with 300,000 net additions. However, the company posted a GAAP net loss of $86M (-$0.089 EPS vs. $0.091 estimated) due to $81M in non-recurring acquisition, restructuring, and legal contingency costs.

At a Glance

- **Revenue Beats but EPS Deeply Misses:** Hims & Hers Health reported Q2 2026 revenue of $753,214,000, which beat the estimated $730,124,130, but its reported Adjusted EPS of -$0.37 missed the estimated 0.091 due to surging non-recurring costs.

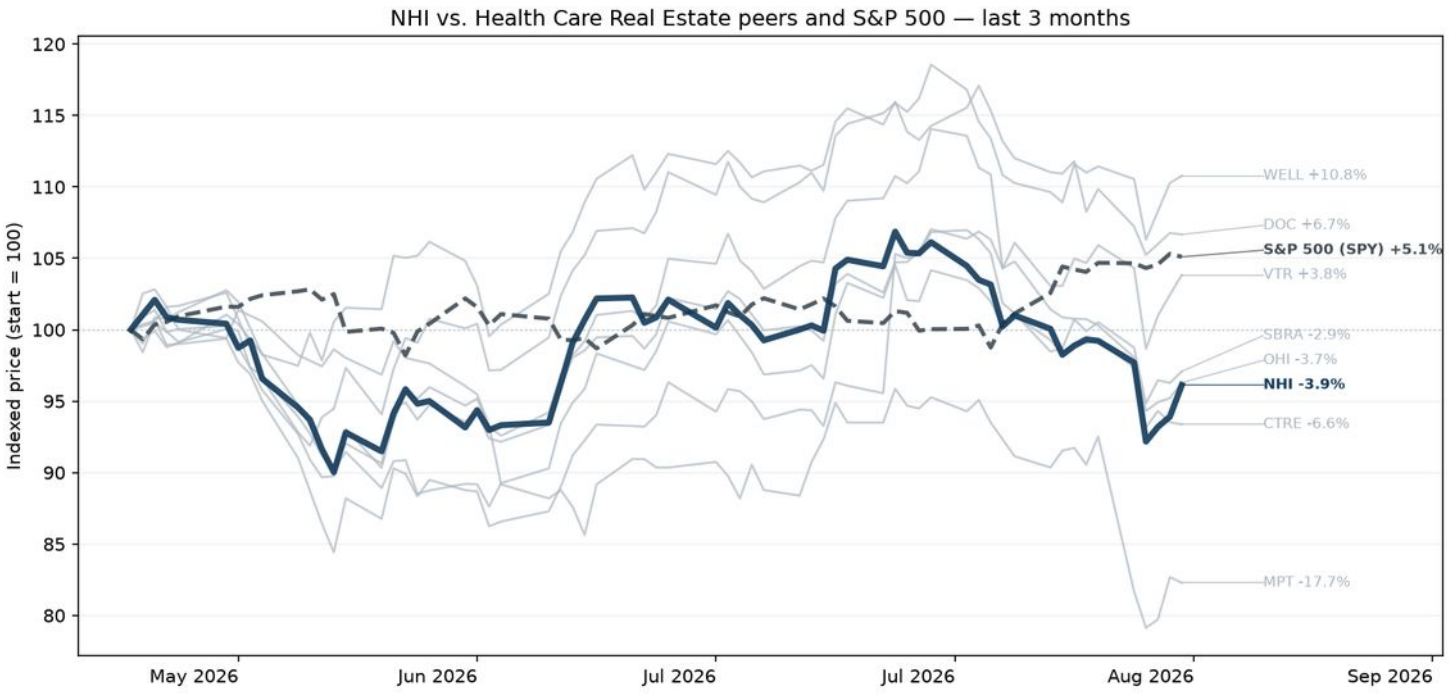

- **Strong Growth in Subscriber KPIs:** The company's subscriber base expanded 19% year-over-year to nearly 2.9 million, while monthly online revenue per average subscriber rose 21% to $92, driven by product mix and weight-loss offerings.
- **Full-Year 2026 Guidance Upgraded Significantly:** Management raised its full-year 2026 revenue guidance to a range of $3.1 billion to $3.3 billion, highlighting strong underlying demand for its personalized consumer health offerings.
- **Acquisitions Drive Explosive International Growth:** Rest of the World revenue surged over 17-fold year-over-year to $131.4 million, fueled directly by the strategic closure of the Eucalyptus acquisition in June 2026.
- **Surging Expenses Compress Gross Margins:** Gross margin fell to 64% from 76% in the prior year's quarter, severely impacted by a strategic shift toward branded weight-loss solutions alongside legal, acquisition, and restructuring expenses.
- **Market Reacts Negatively to Profitability Concerns:** Shares declined following the announcement as investors prioritized the wider-than-expected net loss and compressed margins over the substantial top-line outperformance.

Key Moments from the Call

- **24m 4s — GAAP Net Loss and FTC Litigation:** Investors may be disappointed by the GAAP net loss of $86M and missed EPS expectations. This was driven by $81M in one-time costs, including legal contingency accruals after the FTC filed a complaint on July 29 following failed settlement talks. Management intends to defend its position vigorously.
- **24m 53s — Gross Margin Compression from Mix Shift:** Adjusted gross margins compressed by 6 points quarter-over-quarter to 64%. This contraction will please long-term growth investors as it reflects deliberate scaling of high-demand branded weight loss products and lower-margin international operations, though gross margins are expected to remain below historical levels.
- **30m 33s — AI Efficiency Gains Drive Deflationary Strategy:** An AI rollout for Hers weight loss users reduced non-clinical support tasks by 50% while tripling user messaging. Management plans to pass these cost savings back to consumers via lower weight loss subscription prices and new tools by year-end, echoing a proven market-expansion playbook used in hair and sexual health.
- **36m 35s — Peptides Pipeline and Regulatory Strategy:** Management revealed they are preparing a U.S.-manufactured peptides portfolio. They are currently running validation and stability testing on APIs at their Menlo Park facility, positioning them to launch immediately if and when the FDA issues final 503A compounding regulations, while offering allowed wellness options by year-end.

National Health Investors (NHI) -2.3%

Reported: August 11, 2026 · Google Finance earnings page

Earnings Call Summary

NHI advanced its strategy by completing the sale of the NHC portfolio on July 1, expanding its SHOP platform, and strengthening its balance sheet. The SHOP portfolio performed as expected, and the full-year 2026 outlook remains unchanged, supported by improving sequential same-store results and investments collectively tracking within original underwriting assumptions.

At a Glance

- **NHI Missing Revenue and EPS Estimates:** National Health Investors reported an Adjusted EPS of $1.15, missing the estimated $4.567, while its reported revenue of $121,319,000 beat the estimated $112,511,740.
- **SHOP NOI Experiences Extreme Surge:** Total Senior Housing Operating Portfolio (SHOP) Net Operating Income (NOI) surged 188.5% year-over-year to $11 million, driven by the acquisition and transition of 27 properties.
- **Management Set Multi-Year SHOP Target:** Management outlined its most significant forward guidance target to increase SHOP exposure to 40% to 50% of total assets over the next three years, up from 24% at the end of June.
- **NHC Portfolio Sale Completes Successfully:** NHI completed the sale of its NHC portfolio on July 1, 2026, for $560 million in cash, and expects to recognize a massive real estate gain of

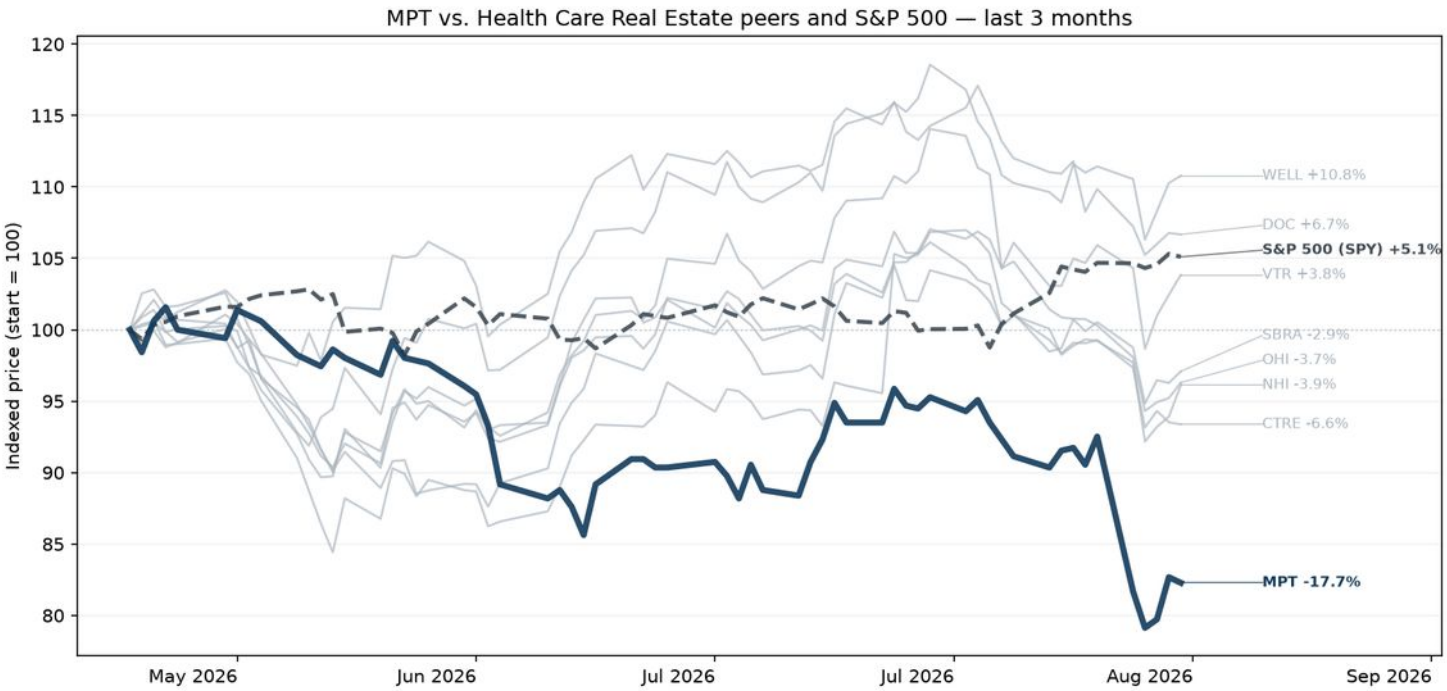

$541.6 million in the third quarter.
- **Board Raises Quarterly Dividend Payout:** Signaling strong confidence in cash flow and capital returns, the Board of Directors approved a $0.02 per share increase to the quarterly dividend, bringing it to $0.94.

Key Moments from the Call

- **15m 20s — NHC Sale Proceeds Deployment:** The $560 million cash sale of the NHC portfolio closed in July. NHI deployed $221 million via reverse Section 1031 exchanges for previous replacements and holds $334 million for future tax-deferred reinvestments, aiming to avoid a special dividend.
- **19m 46s — Accelerated SHOP Platform Goals:** Management plans to grow its SHOP portfolio from 24% to 40%–50% of the total mix over three years. With a new COO onboard, NHI intends to boost its annual acquisition run rate from $200M–$400M to $500M–$700M.
- **26m 11s — Same-Store SHOP Guidance Bridge:** Management maintained its 1% to 3% full-year same-store SHOP NOI guidance despite negative first-half results. Meeting this target implies back-half growth of 8% to 9%, driven by pricing improvements, pipeline rebuilding, and resolving offline unit issues.
- **36m 56s — Triple Net to SHOP Conversions:** NHI sees avenues to convert triple net properties to SHOP before lease expirations. Operators facing CapEx needs or seeking to unlock value and eliminate guarantees create potential negotiation opportunities to capture greater cash flow upside.

Medical Properties Trust (MPT) -17.2%

Reported: August 10, 2026 · Google Finance earnings page

Earnings Call Summary

MPT announced a comprehensive refinancing transaction extending $2.4 billion of debt maturities to 2032, addressing near-term obligations. Post-acute operators led portfolio growth with an EBITDARM increase of over $70 million year-over-year, including a 24% rise at MEDIAN and 13% at Ernest Health, while behavioral health remains under pressure.

At a Glance

- **Revenue Beats Expectations While EPS Misses:** Medical Properties Trust reported Q2 2026 revenue of $270,691,000, beating the estimated $253,284,750, while its reported adjusted EPS of -$0.01 missed the analyst consensus estimate of $0.00.
- **Normalized FFO Remains Relatively Stable:** The company recorded Normalized Funds From Operations (NFFO) of $0.15 per share, matching consensus expectations and improving slightly from $0.14 per share in the prior quarter.
- **Ambitious Long-Term Cash Rent Targets Reaffirmed:** Management highlighted forward targets expecting to achieve an annualized cash rent run-rate exceeding $1 billion by the end of 2026 as collections from key tenants ramp up.
- **Massive Refinancing Package Executed Subsequentially:** The company announced a privately negotiated $2.4 billion refinancing transaction that captures a discount of approximately $123 million and successfully extends major debt maturities.
- **Segment Performance Shows Mixed Operational Results:** Post-acute operators drove the strongest portfolio gains with year-over-year EBITDARM growth of over $70 million, though performance was partially offset by margin pressures in the behavioral health segment.

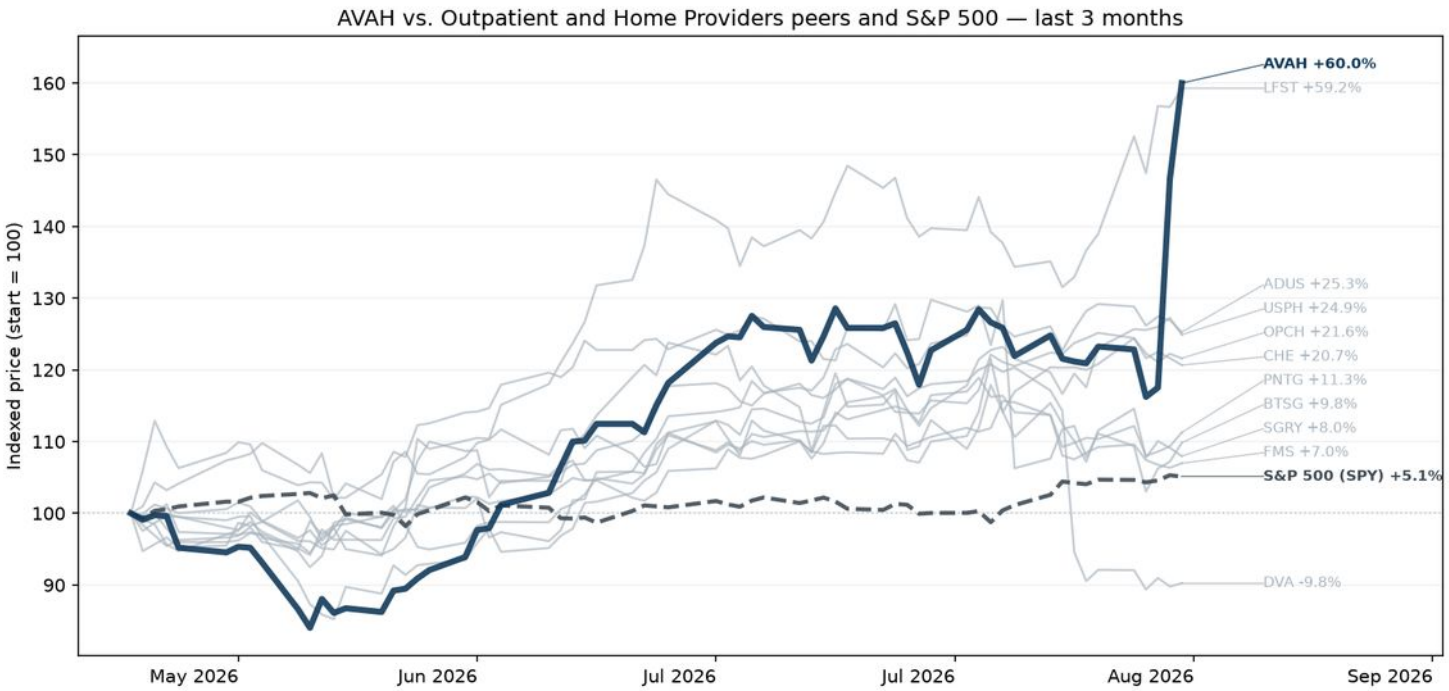

- **Negative Market Reaction Triggers Share Slide:** Shares of Medical Properties Trust dropped over 12% in immediate trading following the release as investors focused on international market challenges and ongoing tenant execution risks.

Key Moments from the Call

- **12m 11s — Comprehensive Two-Step Debt Refinancing:** MPT initiated a two-step refinancing of $2.7 billion in 2026-2027 maturities. Step one issues $2.4 billion in 9.25% secured notes to redeem immediate debt and exchange longer-dated notes, clearing the runway until late 2028 and boosting its unencumbered asset covenant ratio from ~160% toward 300%. This relieves critical near-term liquidity pressure.
- **15m 18s — Asset Sales Validate Private Market Premium:** Management highlighted that third-party transactions demonstrate asset values well above net book values. An imminent asset sale will yield $172 million in net cash proceeds, reflecting a 60% premium over MPT's original investment and a 34% IRR. Further pipeline sales could generate an additional $200 million to $400 million.
- **21m 13s — HSA Cash Collections Lag Operational Strength:** Analysts pressed for details on HSA, which generated a healthy 2x operational coverage but lagged in cash collections (stuck in the 80% range). Temporary billing disruptions from an EMR conversion and state funding delays strained liquidity, though August funding allowed HSA to begin repaying MPT's working capital advances.
- **35m 45s — Secured Debt Capacity Restrictions:** Management acknowledged that the new phase 1 financing pushes MPT's secured debt ratio from 25% to near its 40% covenant ceiling. To regain secured debt capacity for phase 2 and continue deleveraging without dilutive equity issuance, MPT remains highly dependent on completing its ongoing pipeline of asset sales.

Aveanna Healthcare (AVAH) +59.6%

Reported: August 13, 2026 · Google Finance earnings page

Earnings Call Summary

Aveanna Healthcare reported Q2 2026 revenue of $670.5 million, up 13.7% year-over-year, and adjusted EBITDA of $95.4 million, an 8% increase driven by improved rates, volume growth, and operational efficiencies. Performance beat estimates, indicating a stable return to organic growth across all three operating segments.

At a Glance

- **Aveanna Beats EPS and Revenue Estimates:** Aveanna Healthcare reported Q2 2026 Adjusted EPS of $0.18, beating the estimated $0.167, and delivered revenue of $670.48 million, which surpassed the estimated $638.63 million.
- **Segment Growth Drives Key KPIs Higher:** The company delivered robust performance across core KPIs, with Private Duty Services revenue increasing 14.0% year-over-year and Home Health and Hospice revenue climbing 14.8% due to higher volumes and improved reimbursement rates.
- **Management Significantly Raises Full-Year Guidance:** Aveanna raised its full-year 2026 outlook, now expecting revenue to exceed $2.68 billion and Adjusted EBITDA to top $365 million, driven by organic strength rather than its recent acquisition.
- **Strong Cash Flow Strengthens Liquidity Position:** The company generated $75.4 million in positive free cash flow year-to-date and exited the quarter with solid total liquidity of approximately $433 million.
- **Market Welcomes Strong Results with Surge:** Following the earnings release, Aveanna's stock surged more than 18% to nearly touch its 52-week high, prompting multiple Wall Street

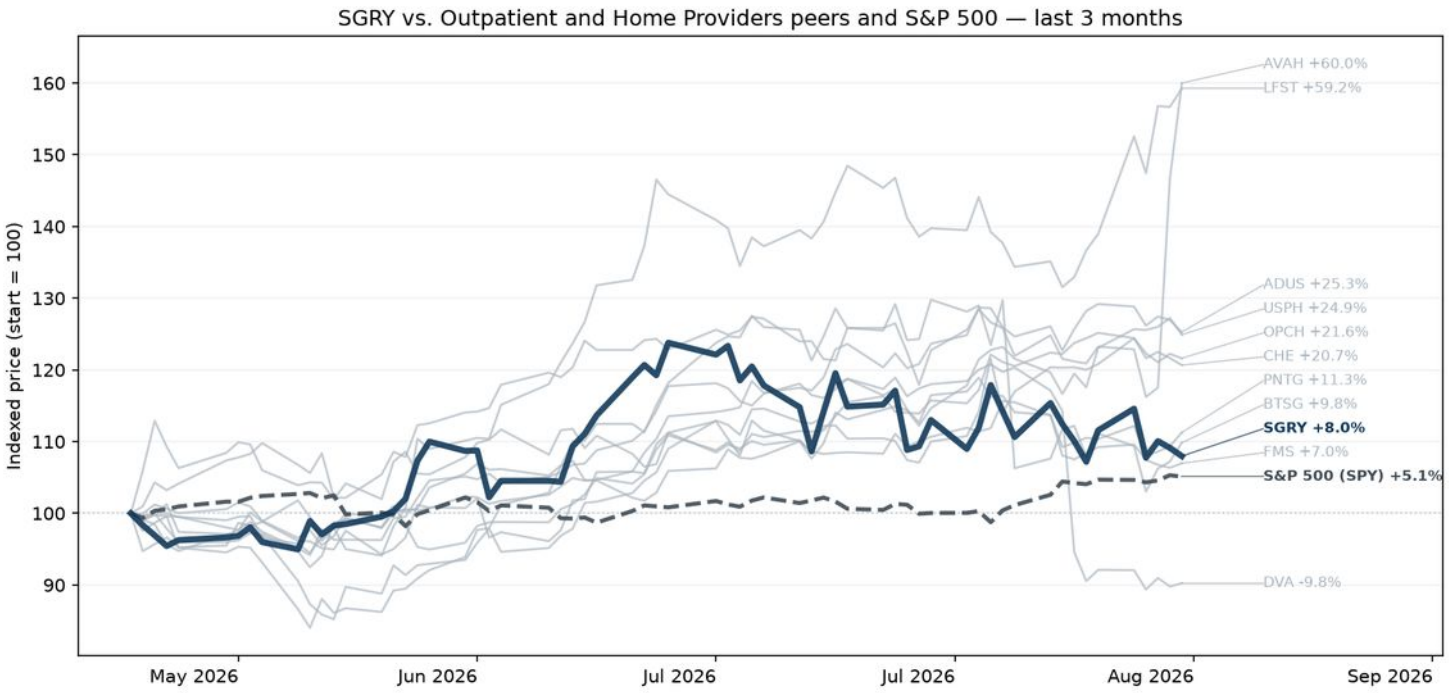

banks to lift their price targets.

Key Moments from the Call

- **4m 41s — Long-Awaited California Rate Breakthrough:** Securing a significant private duty nursing rate increase in California for 2027 marks a major legislative milestone. This allows Aveanna to resolve sub-market caregiver wages and unlock substantial latent volume demand in a previously stagnant state.
- **12m 50s — Guidance Raised and Outlook Enhanced:** Management increased full-year 2026 revenue and EBITDA guidance due to strong core performance. It also raised long-term organic growth expectations across core segments, signaling long-term structural tailwinds from government advocacy.
- **21m 44s — Successful Term Loan Repricing:** Aveanna capitalized on recent credit rating upgrades to reprice its variable term loan, reducing the interest rate by 75 basis points. This move structurally improves the bottom line by lowering annual interest expenses by $10 million.
- **30m 31s — M&A Acceleration and De-leveraging Focus:** The integration of Family First remains ahead of schedule. Fueled by strong free cash flow, management expressed enhanced appetite for future adult Home Health acquisitions while maintaining a strict commitment to reduce leverage below 3x by 2027.

Surgery Partners (SGRY) +7.7%

Reported: August 10, 2026 · Google Finance earnings page

Earnings Call Summary

Surgery Partners delivered Q2 2026 results ahead of internal expectations, posting net revenue of approximately $849 million (up 2.7% year-over-year) and adjusted EBITDA of $125 million, yielding a 14.7% margin. For the first half of 2026, net revenue reached $1.66 billion (+3.6% YoY) while adjusted EBITDA was $228 million.

At a Glance

- **Revenue Beats While EPS Misses:** Surgery Partners reported Q2 2026 revenue of $848.90 million, beating the estimated $830.32 million, while reporting an adjusted EPS loss of -$0.12 which missed the estimated profit of $0.063.
- **Same-Facility Growth Driven by Acuity:** Same-facility revenues increased by 5.0% year-over-year, supported by a 4.8% surge in revenue per case despite flat same-facility case volume growth of 0.3%.
- **Full-Year Guidance Reaffirmed Amid Divestitures:** Management maintained its full-year 2026 revenue guidance of $3.35 billion to $3.45 billion and adjusted EBITDA of at least $530 million, excluding the upcoming impact of its Idaho Falls facility divestiture.
- **Idaho Falls Portfolio Optimization Announced:** The company highlighted a significant portfolio optimization via the pending $795 million divestiture of its Idaho Falls market operations to Intermountain Health to sharpen focus on short-stay surgical facilities.
- **Profitability Squeezed by Margin Compression:** Adjusted EBITDA decreased to $125.2 million from $129.0 million in the prior-year quarter, causing adjusted EBITDA margins to compress to 14.7% due to rising salary expenses and a lack of volume leverage.
- **Elevated Debt Burden Limits Cash Flow:** Operating cash flow dropped 27% year-over-year to $59.3 million, weighed down by high net interest expenses as net leverage remained elevated at 4.4x.

Key Moments from the Call

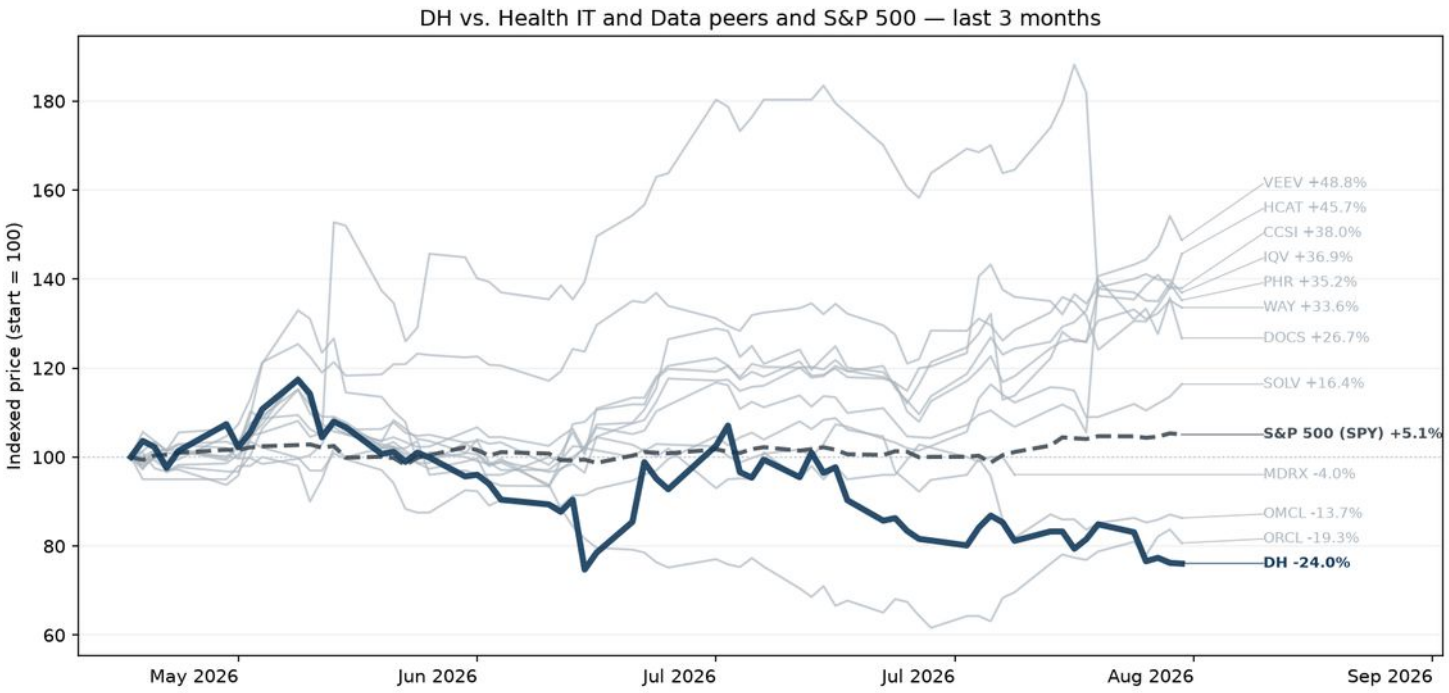

- **1m 19s — Strategic Divestiture of Idaho Falls Assets:** Surgery Partners announced the sale of its Idaho Falls market interests to Intermountain Health for $795 million in gross proceeds. This major portfolio optimization simplifies operations into a pure-play short-stay surgical model, removes capital-intensive non-core acute services, and allows net proceeds to pay down debt, reducing leverage by 0.3 turns.
- **5m 3s — Payer Mix Moderation Impacts Operating Margins:** Commercial payer mix fell 350 basis points year-over-year to 49% of net revenue in Q2, driven by shifts toward government payers in larger surgical hospitals. This anticipated trend increased salaries and wages to

29.8% of revenue (up from 28.5% YoY), though seasonal volume step-ups drove sequential expense improvements.

- **6m 48s — Missing 2026 Annual M&A Target:** Management acknowledged the company will not reach its $200 million average annual M&A investment target in 2026. While disappointing to growth-focused investors, executives clarified that resources were intentionally diverted toward core portfolio optimization, and disciplined, highly strategic integrations will resume late in the year.
- **19m 41s — Acuity Gains and Outpatient Migration Tailwinds:** High-acuity case growth in orthopedics (total joints), spine, and vascular procedures continues to shift from traditional hospitals to ASCs. This structural migration, supported by positive secular regulatory environments like Medicare's inpatient-only list removals, drove an outstanding 4.8% expansion in net revenue per case.

Definitive Healthcare (DH) -20.9%

Reported: August 10, 2026 · Google Finance earnings page

Earnings Call Summary

Definitive Healthcare reported Q2 2026 revenue of $55.2 million, down 9% year-over-year, which met guidance. Adjusted EBITDA was $14.6 million with a 26% margin, exceeding expectations. The company sustained solid cash flow, generating approximately $50 million of unlevered free cash flow for the trailing 12 months.

At a Glance

- **EPS Beats While Revenue Misses:** Definitive Healthcare reported a Reported Adjusted EPS of 0, which surpassed the estimated Adjusted EPS of 0.043, while Reported Revenue of 55,195,000 slightly missed the estimated 55,385,730.
- **Subscription and EBITDA Metrics Stabilize:** Subscription revenues fell 9% year-over-year to $52.8 million, while adjusted EBITDA reached $14.6 million, representing a 26% margin that landed slightly above the high end of internal company guidance.
- **Full-Year Guidance Midpoint Raised:** Management tightened its full-year 2026 revenue visibility to $220 million-$222 million due to lower professional services bookings, but raised the midpoint of its full-year adjusted EBITDA profit outlook to $57 million-$59 million.
- **AI Platform Pilot Program Launched:** The company launched a pilot for Turbo, its new AI-powered healthcare intelligence platform, aiming for general availability by year-end to boost long-term customer retention.
- **Segment Performance and Customer Retention:** The provider and diversified segments represented over 60% of total revenue and paced ahead in returning to growth, whereas the life sciences segment recovery continued to face a prolonged timeline.

Key Moments from the Call

- **4m 29s — Biopharma New Logo Growth Amidst Headwinds:** Despite ongoing macro pressures and slower deployment in the life sciences segment, the biopharma business delivered its strongest new logo acquisition quarter in three years outside of a standard Q4 spike, highlighted by four key customer win-backs.
- **12m 45s — Launch of AI Platform Turbo:** Definitive Healthcare announced the pilot launch of Turbo, an AI-native decision-making platform. While no material revenue impact is projected for 2026, management expects the platform to significantly boost customer retention during critical late-year renewal cycles and drive monetization through usage tiered pricing and module upsells in 2027.
- **16m 58s — Professional Services Bookings Underperform:** Professional services revenue fell short of internal expectations in Q2 2026 due to lighter bookings for traditional analytics engagements. This weakness is expected to create short-term revenue headwinds, impacting the company's sequential top-line outlook into Q3.
- **20m 27s — Full-Year Revenue Guidance Cut and Profitability Raise:** Management tightened and effectively lowered its full-year 2026 revenue guidance to $220 million-$222 million, citing light professional services bookings. However, proactive expense controls allowed them to raise full-year adjusted EBITDA guidance to $57 million-$59 million, expanding the full-year margin outlook by 100 basis points.

Company Overviews

UnitedHealth (UNH)

Payers · $380.1B · 3m +2.0% · 12m +32.1% · 24m -30.5%

Google Finance

Diversified healthcare company operating UHC insurance businesses and the Optum health services platform.

UnitedHealth Group is one of the largest private health insurers and provides medical benefits to about 51 million members globally, including 1 million outside the US as of December 2025. As a leader in employer-sponsored, self-directed, and government-backed insurance plans, UnitedHealth has obtained massive scale in medical insurance. Along with its insurance assets, UnitedHealth's Optum franchises help create a healthcare services colossus that spans everything from pharmaceutical benefits to providing outpatient care and analytics to affiliates and third parties.

CVS Health (CVS)

Payers · $135.1B · 3m +1.3% · 12m +41.6% · 24m +66.5%

Google Finance

Healthcare retail ecosystem.

CVS Health offers a diverse set of healthcare services. Its roots are in its retail pharmacy operations, where it operates around 9,000 stores primarily in the US. CVS is also a large pharmacy benefit manager (acquired through Caremark), processing about 2 billion adjusted claims annually. It operates a top-tier health insurer (acquired through Aetna) through which it serves about 27 million medical members. The acquisition of Oak Street Health added primary care services to the mix, which could have significant synergies with all existing business lines.

Humana (HUM)

Payers · $43.7B · 3m +27.5% · 12m +35.8% · 24m +11.0%

Google Finance

Large payer, Medicare and Medicare Advantage focused.

Humana is one of the largest private health insurers in the US, and the firm has built a niche specializing in government-sponsored programs, with nearly all its medical membership stemming from Medicare, Medicaid, and the military's Tricare program. Beyond medical insurance, the company provides other healthcare services, including primary-care services, at-home services, and pharmacy benefit management.

Oscar Health (OSCR)

Payers · $9.4B · 3m +40.5% · 12m +109.5% · 24m +75.2%

Google Finance

Tech-focused payer with large exposure to exchange products and ICHRAs.

Oscar Health Inc is a healthcare technology company built around a full stack technology platform and a relentless focus on serving its members. It offers Individual & Family plans and health technology solutions that power the healthcare industry. Oscar operates as one segment to sell insurance to individuals, families and employees through the federal and state-run healthcare exchanges formed in conjunction with the Patient Protection and Affordable Care Act (ACA) and leverages its technology platform to provide services via its Oscar offering.

Molina Healthcare (MOH)

Payers · $10.2B · 3m +14.8% · 12m +26.8% · 24m -39.3%

Google Finance

Managed-care company providing health insurance through government programs.

Molina Healthcare Inc provides medical insurance plans through Medicaid, the individual exchanges, and Medicare. The company operates in four reportable segments consisting of: 1) Medicaid; 2) Medicare; 3) Marketplace; and 4) Other. It manages health benefit risks for more than 5 million people, with more than 85% of those members coming through contracts with state governments for their Medicaid programs. Medicaid contracts in four states-California, New York, Texas, and Washington-account for over half of its enrollees.

Cigna (CI)

Payers · $73.7B · 3m -0.9% · 12m -4.8% · 24m -17.5%

Google Finance

Employer-focused health insurance company.

Cigna primarily provides pharmacy benefit management and health insurance services. Its PBM and specialty pharmacy services, which were greatly expanded by its 2018 merger with Express Scripts, are mostly sold to health insurance plans and employers. Its largest PBM contract is with the Department of Defense, and it recently won a multiyear deal with top-tier insurer Centene. In health insurance and other benefits, Cigna primarily serves employers through self-funding arrangements, and the company operates mostly in the US with 16 million US and 2 million international medical members covered as of December 2025.

Elevance (ELV)

Payers · $81.5B · 3m +1.9% · 12m +29.3% · 24m -26.4%

Google Finance

Health insurance company, previously named Anthem.

Elevance Health remains one of the leading health insurers in the US, providing medical benefits to 45 million medical members at the end of 2025. The company offers employer, individual, and government-sponsored coverage plans. Elevance differs from its peers in its unique position as the largest single provider of Blue Cross Blue Shield branded coverage, operating as the licensee for the Blue Cross Blue Shield Association in 14 states. Through acquisitions, such as the Amerigroup deal in 2012 and MMM in 2021, Elevance's reach expands beyond those states in government-sponsored programs, such as Medicaid and Medicare Advantage plans, too. It is also an emerging player in pharmacy benefit management and other healthcare services.

Clover Health (CLOV)

Payers · $2.2B · 3m +32.6% · 12m +73.6% · 24m +62.5%

Google Finance

American healthcare company company providing Medicare Advantage insurance plans.

Clover Health Investments Corp is a healthcare technology company. It focuses on empowering Medicare physicians to proactively manage chronic diseases through its proprietary software

platform, Clover Assistant. This cloud-based solution provides personalized insights to physicians, enabling early detection and management of chronic conditions. It operates in one segment: Insurance, through which it offers PPO and HMO plans to Medicare Advantage members in several states.

Centene (CNC)

Payers · $30.7B · 3m +15.8% · 12m +136.8% · 24m -13.6%

Google Finance

Health insurance for government and privately insured healthcare programs.

Centene is a managed care organization that focuses on government-sponsored healthcare plans, including Medicaid, Medicare, and the individual exchanges. Centene served 20 million medical members as of December 2025, mostly in Medicaid (about 64% of membership), the individual exchanges (about 28%), and Medicare (about 5%). The company also provides Medicare Part D pharmaceutical plans.

Alignment Health (ALHC)

Payers · $3.1B · 3m -11.3% · 12m -7.2% · 24m +60.5%

Google Finance

Tech-enabled Medicare Advantage Company.

Alignment Healthcare Inc is a next-generation, consumer-centric platform that is revolutionizing the healthcare experience for seniors through Medicare Advantage plans. These plans are marketed and sold direct-to-consumer, allowing seniors to select the manner in which customers receive healthcare coverage and services on an annual basis. The company combines a technology platform and clinical model for more effective health outcomes.

HCA Healthcare (HCA)

Health System Providers · $87.2B · 3m -4.3% · 12m +2.2% · 24m +8.3%

Google Finance

Largest for-profit hospital and outpatient care operator in the United States.

HCA Healthcare is a Nashville-based healthcare provider organization operating the largest collection of acute-care hospitals in the United States. As of December 2025, the firm owned and operated 190 hospitals and over 2,500 outpatient facillities across 19 states and a small foothold in the United Kingdom.

Tenet Health (THC)

Health System Providers · $20.5B · 3m +36.2% · 12m +55.7% · 24m +71.0%

Google Finance

Diversified healthcare provider with hospitals and a leading ambulatory surgery center platform through USPI.

Tenet Healthcare is a Dallas-based healthcare services organization. It operates acute and specialty hospitals (50 as of December 2025) and hundreds of ambulatory surgery centers and other outpatient facilities across the US, primarily in the South. Through its Conifer segment, Tenet also provides revenue cycle management solutions.

Universal Health Services (UHS)

Health System Providers · $10.2B · 3m +0.8% · 12m -4.7% · 24m -24.9%

Google Finance

Hospital operator with significant acute care and behavioral health business.

Universal Health Services Inc offers healthcare services through its behavioral health centers, acute care hospitals, and related outpatient facilities. As of late 2025, the company operated 346 inpatient behavioral health centers, 29 acute care hospitals, and many supportive outpatient facilities. Its operations are concentrated in the U.S, particularly in Nevada (21% of 2025 operating profits), Texas (19%), and California (13%), although it does have some exposure to the UK behavioral health market (6% of 2025 sales) too. While its acute care services account for over 55% of revenue, the behavioral health centers sport higher margins and account for over 55% of pretax profits.

Community Health Systems (CYH)

Health System Providers · $417.4M · 3m +6.4% · 12m +9.9% · 24m -40.1%

Google Finance

Operator of community hospitals primarily serving non-urban and regional markets.

Community Health Systems Inc is a publicly owned hospital operator in the United States. The company also owns four home health agencies and provides management and consulting services to independent hospitals. The firm derives revenue through a broad range of general and specialized hospital healthcare services and outpatient services.

Ardent Health Partners (ARDT)

Health System Providers · $1.5B · 3m +8.0% · 12m -12.6% · 24m -35.6%

Regional hospital operator focused on integrated health systems across mid-sized US markets.

Ardent Health Inc is a provider of healthcare in growing mid-sized urban communities across the U.S and operating in eight growing mid-sized urban markets across six states Texas, Oklahoma, New Mexico, New Jersey, Idaho, and Kansas. The main focus on people and investments in services and technologies.

The Ensign Group (ENSG)

Inpatient Non-Acute Providers · $10.4B · 3m +2.2% · 12m +9.3% · 24m +28.6%

Google Finance

Leading operator of skilled nursing facilities, rehabilitation centers, and senior-care services.

Ensign Group Inc provides post-acute healthcare services in the United States. Its regional subsidiaries oversee skilled nursing, assisted living, home health and hospice, mobile ancillary, and urgent care operations. Medicare and Medicaid programs contribute majority of revenue received for Ensign's services. The firm operates through two segments, Skilled services, and Standard Bearer. The skilled services segment includes the operation of skilled nursing facilities and rehabilitation therapy services. The Standard Bearer segment comprises of properties owned by the company through its captive REIT and leased to skilled nursing and assisted living operations. The majority of the revenue is generated from the skilled services segment.

Acadia Healthcare (ACHC)

Inpatient Non-Acute Providers · $2.8B · 3m +19.4% · 12m +46.9% · 24m -58.6%

Google Finance

Largest provider of behavioral health and addiction treatment services.

Acadia Healthcare Co Inc acquires and develops behavioral healthcare facilities. Its facilities and services are classified into the following categories: acute inpatient psychiatric facilities; specialty treatment facilities; CTCs; and residential treatment centers. In which Acute inpatient psychiatric facilities contribute the majority of revenue in the United States. The Company has one reportable segment, behavioral healthcare services. The behavioral healthcare services segment provides inpatient and outpatient behavioral healthcare services.

Encompass Health (EHC)

Inpatient Non-Acute Providers · $11.0B · 3m +15.9% · 12m +2.7% · 24m +39.5%

Google Finance

In-patient post-acute rehabilitation services.

Encompass Health Corp provides post-acute healthcare services in the United States through a network of inpatient rehabilitation hospitals, which is the company's sole segment. Inpatient rehabilitation contributes the majority of the firm's revenue and provides specialized rehabilitative treatment through a network of inpatient hospitals. The company's inpatient rehabilitation hospitals provide a higher level of rehabilitative care to patients who are recovering from conditions such as stroke and other neurological disorders, cardiac and pulmonary conditions, brain and spinal cord injuries, complex orthopedic conditions, and amputations.

PACS Group (PACS)

Inpatient Non-Acute Providers · $7.3B · 3m +18.6% · 12m +286.4% · 24m +14.6%

Google Finance

Post-acute care and skilled nursing company.

PACS Group Inc is a post-acute healthcare company mainly focused on delivering skilled nursing care through a portfolio of independently operated facilities. The post-acute care ecosystem serves individuals who need additional help recuperating from acute conditions, illnesses, or serious medical procedures after getting discharged from the hospital. It also provides senior care, assisted

living, and independent living options in some of the communities. The company has one reportable segment.

Healthpeak properties (DOC)

Health Care Real Estate · $15.1B · 3m +7.4% · 12m +20.1% · 24m -3.2%

Google Finance

Healthcare industry real estate investment trust focused on outpatient medical offices, life science properties, an senior housing.

Healthpeak owns a diversified healthcare portfolio of approximately 700 in-place properties spread across mainly medical office and life science assets, plus a handful of senior housing, hospital, and skilled nursing/post-acute care assets, as well.

Ventas, Inc (VTR)

Health Care Real Estate · $48.0B · 3m +4.7% · 12m +35.0% · 24m +56.7%

Google Finance

Leading cloud-software provider for life sciences companies, supporting CRM, clinical trails, regulatory processes, and commercialization.

Veeva is the global leading supplier of cloud-based software solutions for the life sciences industry. The company's best-of-breed offerings address operating and regulatory requirements for customers ranging from small, emerging biotechnology companies to departments of global pharmaceutical manufacturers. The company leverages its domain expertise to improve the efficiency and compliance of the underserved life sciences industry, displacing large, highly customized and dated enterprise resource planning systems that have limited flexibility. Its two main products are Veeva CRM, a customer relationship management platform for companies with a salesforce, and Veeva Vault, a content management platform that tackles various functions within any life sciences company.

Omnicell (OMCL)

Health IT and Data · $1.7B · 3m -13.5% · 12m +17.7% · 24m -12.3%

Google Finance

Pharmacy automation, medication management, and healthcare workflow software.

Omnicell Inc provides automation and business analytics software for healthcare providers. The company is engaged in transforming the pharmacy and nursing care delivery model. The company helps its customers define and deliver cost-effective medication management designed to equip and empower pharmacists and nurses to focus on patient care rather than administrative tasks and drive improved clinical, operational, and financial outcomes across all care settings. The company derives the majority of its revenue from the United States.

McKesson (MCK)

Pharma Distribution · $97.2B · 3m +14.3% · 12m +29.1% · 24m +58.7%

Google Finance

Largest pharmaceutical distributor in North America.

McKesson is one of three leading pharmaceutical wholesalers in the US engaged in sourcing and distributing branded, generic, and specialty pharmaceutical products to pharmacies (retail chains, independent, and mail order), hospitals networks, and healthcare providers. Along with Cencora and Cardinal Health, the three account for over 90% of the US pharmaceutical wholesale industry. Outside the US market, McKesson engages in pharmaceutical wholesale and distribution in Canada. Additionally, the company supplies medical-surgical products and equipment to healthcare facilities and provides a variety of technology solutions for pharmacies.

Cardinal Health (CAH)

Pharma Distribution · $54.7B · 3m +20.5% · 12m +57.2% · 24m +114.1%

Google Finance

One of the big three drug wholesalesrs, providing pharma distribution, medical products, and supply chain services.

Cardinal Health is one of three leading pharmaceutical wholesalers in the US, engaged in sourcing and distributing of branded, generic, and specialty pharmaceutical products to pharmacies (retail chains, independent, and mail order), hospital networks, and healthcare providers. Cardinal, Cencora, and McKesson hold well over 90% of the US pharmaceutical wholesale industry. Cardinal Health also supplies medical-surgical products and equipment to healthcare facilities in North America, Europe, and Asia.

Cencora (COR)

Pharma Distribution · $59.6B · 3m +21.8% · 12m +7.2% · 24m +31.8%

Google Finance

Formerly AmerisourceBergen, Global pharmaceutical distribution and specialty-services leader.

Cencora is one of three leading domestic pharmaceutical wholesalers. It sources and distributes branded, generic, and specialty pharmaceutical products to pharmacies (retail chains, independent, and mail order), hospital networks, and healthcare providers. It and McKesson and Cardinal Health hold over 90% share of the US pharmaceutical wholesale industry. Cencora also provides commercialization services for manufacturers of pharmaceuticals and medical devices, global specialty drug logistics (World Courier), and animal health product distribution (MWI Animal Health).

Cencora expanded its international presence in 2021 by purchasing Alliance Healthcare, one of the leading drug wholesalers in Europe.

Accendra Health (AHCO)

Pharma Distribution · $912.9M · 3m -45.5% · 12m -38.7% · 24m -44.5%

Google Finance

Medical and Surgical supply distributor with a significant healthcare logistics business.

AdaptHealth Corp is engaged in providing patient-centered, healthcare-at-home solutions including home medical equipment (HME), medical supplies, and related services. The Company operates under four reportable segments that align with its product categories: (i) Sleep Health, (ii) Respiratory Health, (iii) Diabetes Health, and (iv) Wellness at Home. The company generates majority of its revenue from the Sleep Health segment. The Sleep Health segment provides sleep therapy equipment, supplies and related services (including continuous positive airway pressure and BiLevel services) to individuals for the treatment of obstructive sleep apnea.

Henry Schein (HSIC)

Pharma Distribution · $10.2B · 3m +23.4% · 12m +32.3% · 24m +28.6%

Google Finance

Leading dental product, tech, and physician office supply distributor.

Henry Schein Inc is a solutions company for healthcare professionals. It offers healthcare equipment, products, and services to office-based dental and medical practitioners, as well as alternative sites of care. The company's reportable segments are: Global Distribution and Value-Added Services, Global Specialty Products, and Global Technology. It generates maximum revenue from the Global Distribution and Value-Added Services segment, which includes distribution to the dental and medical markets of national brand and corporate brand merchandise, as well as equipment and related technical services. This segment also includes value-added services such as financial services, continuing education services, consulting, and other practice services.

Natera (NTRA)

Precision Diagnostics · $39.4B · 3m +66.3% · 12m +90.1% · 24m +150.0%

Google Finance

molecular diagnostics leader using cell-free DNA testing for prenatal screening, oncology monitoring, and transplant surveillance.

Natera Inc is a diagnostic and research company with proprietary molecular and bioinformatics technology. The company's key product offerings include its Panorama Non-Invasive Prenatal Test (NIPT) which screens for chromosomal abnormalities of a fetus as well as in twin pregnancies, typically with a blood draw from the mother, Horizon Carrier Screening (HCS) to determine carrier status for a large number of severe genetic diseases that could be passed on to the carrier's children, Signatera molecular residual disease (MRD) test, which detects circulating tumor DNA in patients previously diagnosed with cancer to assess molecular residual disease and monitor for recurrence; and Prospera, to assess organ transplant rejection.

NeoGenomics (NEO)

Precision Diagnostics · $2.1B · 3m +93.4% · 12m +156.7% · 24m -1.5%

Google Finance

precision oncology diagnostics company providing cancer testing, genomic profiling, and biomarker services.

NeoGenomics Inc provides oncology diagnostic testing and consultative services which include technical laboratory services and professional interpretation of laboratory test results by licensed physicians or molecular experts in pathology and oncology. The company operates a network of cancer-focused testing laboratories in the United States and the United Kingdom. The company operates in a single segment and derives revenue from clients by providing clinical cancer testing, interpretation, and consultative services, molecular and NGS testing, comprehensive technical and professional services offerings, clinical trials and research, validation laboratory services, and oncology data solutions.

BillionToOne (BLLN)

Precision Diagnostics · $6.5B · 3m +12.9% · 12m n/a · 24m n/a

Google Finance

molecular diagnostics company focused on prenatal screening and precision oncology testing.

BillionToOne Inc is a molecular diagnostics company. It offers a portfolio of ultrasensitive tests covering prenatal genetic testing, cancer therapy selection, and response monitoring, which are based on its Quantitative Counting Templates (QCT) molecular counting platform. The company's product portfolio comprises UNITY, a portfolio of prenatal testing products that can conduct fetal risk analysis without requiring a paternal sample; Northstar Select, a ultrasensitive liquid biopsy test that provides insights into appropriate therapies for stage III or IV cancer patients; and Northstar Response, a tissue-free, pan-cancer, liquid biopsy test that measures several genomic loci uniquely methylated in cancer to provide insight into dynamic changes in therapy response.

Guardant Health (GH)

Precision Diagnostics · $21.4B · 3m +65.6% · 12m +167.0% · 24m +462.5%

Google Finance

liquid-biopsy leader using blood-based genomic testing for cancer detection, treatment selection, and disease monitoring.

Guardant Health, based in Redwood City, California, is a leader in liquid-based cancer tests for clinical and research use. The company's main franchises are Guardant360 for genomic profiling of tumors, Reveal for molecular residual disease testing, and Shield for colorectal cancer screening. Additionally, Guardant offers research development services such as regulatory approval consultancy and clinical trial referrals.

Tempus AI (TEM)

Precision Diagnostics · $8.5B · 3m +18.6% · 12m -29.4% · 24m +2.4%

Google Finance

precision medicine company combining genomic testing, clinical data, and artificial intelligence to support treatment decisions and drug development.

Tempus AI Inc is a technology company. It has built the Tempus Platform, which comprises both a technology platform to free healthcare data from silos and an operating system to make the resulting data useful. Its Intelligent Diagnostics use AI, including generative AI, to make laboratory tests more accurate, tailored, and personal.

Illumina (ILMN)

Precision Diagnostics · $30.7B · 3m +33.9% · 12m +90.7% · 24m +46.5%

Google Finance

leading DNA sequencing platform company providing foundational technology for genomics research and clinical testing.

Illumina provides tools and services to analyze genetic material with life science and clinical lab applications. The company generates over 90% of its revenue from sequencing instruments, consumables, and services. Illumina's high-throughput technology enables whole genome sequencing in humans and other large organisms. Its lower throughput tools enable applications that require smaller data outputs, such as viral and cancer tumor screening. Illumina also sells microarrays that enable lower-cost, focused genetic screening with primarily consumer and agricultural applications.

10x Genomics (TXG)

Precision Diagnostics · $6.1B · 3m +164.6% · 12m +319.8% · 24m +157.9%

Google Finance

leader in single-cell and spatial biology technologies used in genomics research and drug discovery.

10x Genomics Inc is a life science technology company based in the United States. Its solutions include instruments, consumables, and software for analyzing biological systems. The company's integrated solutions include instruments, consumables, and software for analyzing biological systems at a resolution and scale that matches the complexity of biology. Its product offerings include a Chromium platform comprising microfluidic chips and related consumables, Chromium X series, Visium and Xenium platforms, and others, which are predominantly used for the study of biological components. Geographically, the company derives operates from the United States and the rest from Americas (excluding the United States), Europe, Middle East and Africa, China, and Asia-Pacific (excluding China).

PacBio (PACB)

Precision Diagnostics · $447.3M · 3m +2.7% · 12m -12.2% · 24m -26.3%

Google Finance

developer of long-read DNA sequencing technologies used to analyze complex genomes.

Pacific Biosciences of California Inc is a biotechnology company focused on designing, developing, and manufacturing sequencing solutions that enable scientists and clinical researchers to improve their understanding of the genome and ultimately, resolve genetically complex problems. It operates in, one reportable segment: the development, manufacturing, and marketing of an integrated platform for genetic analysis. The majority of the company's revenue is derived from Americas, followed by Europe Middle East, and Africa and Asia-Pacific.

QuidelOrtho (QDEL)

Precision Diagnostics · $1.2B · 3m +38.6% · 12m -44.9% · 24m -67.5%

Google Finance

diagnostics company providing clinical laboratory, immunoassay, and point-of-care testing solutions.

QuidelOrtho Corp is engaged in the development, manufacturing, and marketing of rapid diagnostic testing solutions. The company is engaged in immunoassay and molecular testing, clinical chemistry, and transfusion medicine, which helps clinicians and patients to make decisions across the globe. Geographically, the company has its presence in North America, EMEA, China, and Other countries. It generates the majority of its revenue from North America.

Quest Diagnostics (DGX)

Precision Diagnostics · $25.8B · 3m +25.6% · 12m +30.4% · 24m +54.8%

Google Finance

largest U.S. independent clinical laboratory and diagnostic testing company.

Quest Diagnostics is a leading independent provider of diagnostic testing, information, and services in the US. The company generates over 97% of its revenue through clinical testing, anatomic pathology, esoteric testing, and substance abuse testing with specimens collected at its national network of roughly 2,400 patient service centers, as well as multiple doctors offices and hospitals. The firm also runs a much smaller diagnostic solutions segment that provides clinical trials testing, risk-assessment services, and information technology solutions.

Labcorp Holdings (LH)

Precision Diagnostics · $25.3B · 3m +27.0% · 12m +17.7% · 24m +39.8%

Google Finance

leading diagnostics and laboratory services company with substantial genomic and specialty testing capabilities.

Labcorp is one of the nation's two largest independent clinical laboratories, with roughly 20% of the independent lab market. The company operates approximately 2,000 patient-service centers, offering a broad range of 5,000 clinical lab tests, ranging from uncomplicated routine blood and urine screens to complex oncology and genomic testing.

Certara (CERT)

Precision Diagnostics · $1.2B · 3m +78.6% · 12m -27.4% · 24m -33.6%

Google Finance

biosimulation and data-driven drug development company supporting precision medicine and clinical development.

Certara Inc accelerates medicines to patients using biosimulation software and technology to transform traditional drug discovery and development. It provides modeling and simulation, regulatory science, and assessment software and services to help clients reduce clinical trials, accelerate regulatory approval, and increase patient access to medicines. The company has its business presence in the Americas, which is also its key revenue-generating market, EMEA, and the Asia Pacific region.
